

Herbs

Encapsulated herbal extract in beadlet form to stabilize their bioactive component and preserve their shelf life.

Ashwagandha 65%

65% Ashwagandha encapsulated in beadlet form to protect from degradation and moisture.

Panax Ginseng 65%

65% Ginseng encapsulated in beadlet form to protect from degradation and moisture.

Reishi (Mushroom) 50%

50% Mushroom encapsulated in beadlet form to protect from degradation and moisture.

Ginger 50%

50% Ginger encapsulated in beadlet form to protect from degradation and moisture.

Actives

Encapsulation of nutraceutical actives optimizes its delivery with a sustained release formats, providing a gradual release over an extended period of time.

Melatonin 2%

2% Melatonin encapsulated in beadlet form to provide precise dose in controlled formats.

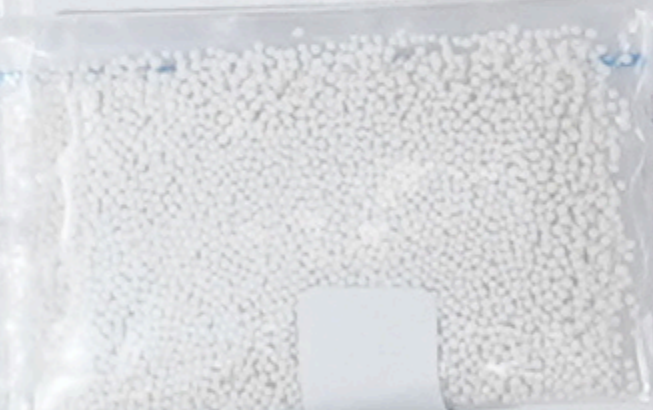

ALA (Alpha Lipoic Acid) 80%

80% ALA encapsulated in beadlet form to protect from moisture degradation.

Hyaluronic Acid 70%

70% Hyaluronic acid encapsulated in beadlet form to protect from moisture degradation.

Glucosamine & MSM

Glucosamine & MSM encapsulated in beadlet form to protect from external factors.

Taste Masked

Numerous actives are unpleasant in taste, encapsulation helps in making the off-note, bitter note, metallic note of such actives for beverages, gummies and other applications.

Caffeine 50%

50% Taste masked Caffeine powder to improve the desirable taste.

Ashwagandha 40%

40% Taste masked Ashwagandha powder to improve the undesirable taste.

Spirulina 30%

30% Taste masked Spirulina powder to improve the desirable taste.

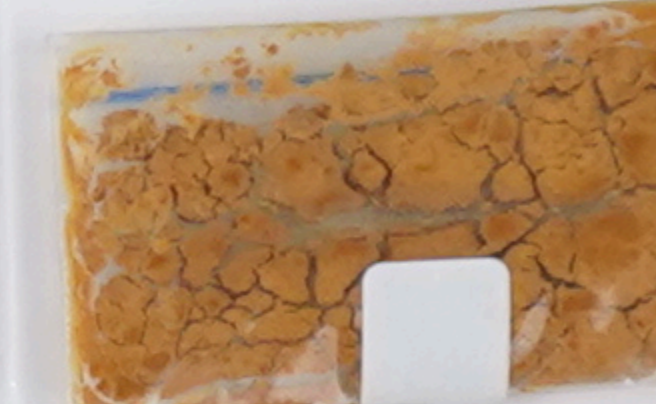

Vitamin C 40%

40% Taste masked Vitamin C powder to improve the desirable taste.

Liposomes

Liposomes technique involves encapsulating active ingredients within lipid capsules, enhancing stability in a moisture containing environment, available in powder and beadlet form.

Vitamin C 40%

Lipid coated Vitamin C powder/beadlet protects from moisture degradation.

CoQ 10 7.4%

Lipid coated CoQ 10 powder protects from moisture degradation.

Curcumin 50%

Lipid coated Curcumin powder protects from moisture degradation.

Ferrous Fumarate 25%

Lipid coated Ferrous Fumarate powder protects from moisture degradation.

Vitamins

Vitamin encapsulation protects them from various external factors during storage, enhancing functional properties such as solubility, stability, and controlled release, and is available in spray-dried powder and beadlet form.

Vitamin D3 1% + Vitamin B12 1% + Vitamin K 1%

1% Vitamin D3, Vitamin B12 & Vitamin K encapsulated in beadlet form to protect from external factors.

Vitamin E 40%

40% Vitamin E encapsulated in beadlet form to protect from external factors.

Minerals

Encapsulated minerals in powder/beadlet form, can be a convenient and effective way to ensure the steady supply of mineral to the body.

Zinc Oxide 40%

40% Zinc encapsulated in beadlet form to increase bioavailability.

Potassium Chloride SR 90%

90% Potassium chloride encapsulated in beadlet form to increase bioavailability.

Sustained Release

SR forms are designed to slowly release a nutraceutical actives in the body over an extended period of time. It provides the ability to maintain a constant level of active within the body.

Caffeine SR 83%

83% Sustained release Caffeine in beadlet form to provide a sustained release.

Curcumin SR 75%

75% Sustained release Curcumin in beadlet form to provide a sustained release.

Enteric Coated

Enteric-coated forms protect the nutraceutical actives from acidic pH and enzymatic degradation in the stomach and allow their release in the small intestine.

Peppermint EC 40%

40% Enteric coated Peppermint in beadlet form to protect from gastric environment.

Pancreatin EC 10,000 IU and 25,000 IU

Enteric coated Pancreatin in beadlet form available in 10,000 IU and 25,000 IU activity.
